LWCIRCUS OPERATIVE WORKSHOP | Landscape Design Methods based on Social Practices
Shared practices strategies for natural areas preservation + cultural landscape valorization

Shared Operative Workshop to create **Ephemeral Installations**, as light urban furniture, staging points, temporary shelters, realized on site by the revisitation and assembling of **recycled natural material** transported by the changing river's moods.

A temporary international, multi cultural and multidisciplinary creative community will test in the field shared practices by using multimedia languages, artistic approaches and performative-spontaneous attitudes in the specific urban context, with the direct involvement of local actors and public institutions responsible for the river's management and safeguard, looking for a **RESILIENT** and **INCLUSIVE** urban future, in terms of responsible cultural valorization and sustainable development for the local community and the diverse minorities directly involved in each step of the operative shared process.

LWCIRCUS.ORG - In **2016 LWCircus.org** was founded - a non-profit multi-national Organisation based between **Florence, Rome, Mexico City** and **Beirut**. The Organisation has embraced a worldwide network of practitioners, researchers and artists supporting the **LWCircus Program**. The workshop new formula is strictly operative and performance-based, strongly shared and multinational, between Mediterranean, Mexico and MENA Countries, created in collaboration with some International Universities and other Cultural Institutions. The **Program** is focused on experimental methodologies and strategies based on social practices on the field, to enhance sensitive areas and redesign contemporary rural and urban landscape under transition in terms of environmental, social and economic aspects. **LWCircus** looks for alternative tools and devices to activate sustainable development and responsible action through **operative shared workshops**, through the direct involvement of local communities, minorities and well known international practitioners. The operative shared workshops stimulate the creation of a multicultural and interdisciplinary flow to exchange knowledge, information, attitudes, skills and real-world know-how through artistic expression and multiple forms of media. The outcomes aim to help result in integration, cultural and economic development for local inhabitants and minorities involved.
